Activities if any:

Question and answer session on phases of compiler – Students conduct the session. Students are informed in advance about the date of the session so that they come prepared.

Step 1 : One student poses a question relevant to Unit 1 to another student.

Step 2 : Student who has been asked the question provides his answer.

Step 3 : The same question is addressed to another student and asked to give the answer.

If he/ she feels first answer is correct, agrees and repeats the answer and otherwise provides the correct answer.

Step 4 : The same question is addressed to a third student and asked to give the answer.

If the answers are correct, agrees and repeats the answer and otherwise provides the correct answer.

Step 5 : Student who has put the question sums up the correct answer.

Step 6 : Teacher expresses the view on he answers and the process continues with another question by another student.

3. A Role Play: - Students are given prior information on role they have to play and are asked to submit their proposed dialogues to the subject teacher. Students perform their roles on the prescribed dates in the class on the topics compiler phases and handling error.

Content beyond Syllabus:

Reason for Content beyond Syllabus:

The curriculum and syllabus have been framed 4 years back. So the gaps arising out of new developments in meeting the outcomes have been identified and provided as contents beyond syllabus. Study of various practical cases on lexer and parsing tools and awareness on compiler writing tools has been included.

Content beyond Syllabus:
