## Agreement for Annual Software Maintenance Services

Period:

21 January 2005 to 31 Dec 2005

Nirmal Institute of Computer Expertise (NICE), 96 St Mary's Topé, Tiruchirapalli 620 002, Tamil Nadu, India (hereinafter "Vendor") and

The Secretary M.I.E.T  
Gundur

(hereinafter "Customer") hereby agree that the following terms and conditions shall govern all cases in which Vendor personnel furnish assistance to the Customer in the installation or use of data processing equipment.

### SERVICES

This Agreement shall cover all assistance in the installation or use of data processing equipment and programming provided by Vendor personnel at the Customer's request, including, but not limited to, special studies, any programming and application design, development, and modifications, systems analysis and design, conversion and implementation planning, and installation evaluations. These services may be performed at either the Customer's or Vendor's premises, at the exclusive option of Vendor and Vendor's judgment as to where said services shall be most effectively performed. All requests for services shall specifically reference and be subject to this agreement, whether requested verbally or in writing.

Specifically, this Agreement provides for emergency corrections to Customer's programs and inspection of Customer's data files, operating system software, and language software by Vendor. Said corrections will be both preventative and remedial, and will include up to specified maximum amounts of time devoted by Vendor personnel as specified below. Time may NOT be accumulated month to month.

Customer Operating System : WindowsXP/2000

Customer Language System

Customer Hardware Description : Server/Clients

Maximum Hours on Customer's Services by Vendor (Quarterly):

Maximum Hours of Phone Support by Vendor to Customer(Monthly):

Fee Estimate for Inspection of Customer's Systems :

### TERM

This Agreement shall be effective from the date on which it is accepted by Vendor and shall remain in force until terminated by either party on thirty (30) days prior written notice, except that non-payment of annual service charges or other charges billed under this agreement shall be cause for immediate termination. Completion of any specific services or Customer's failure to order additional services hereunder shall not terminate this agreement, it being the intent of the parties to leave this Agreement in effect in the event of future orders for services.

# NIRMALS®

Network Information Resources Management of Academic Library System

## Bibliothèque tour de force

- Sets a paradigm for Map(Multi-access points) to library resources
- Superior by Futuristic Design & Archetypal Functionality
- Ranking among top-notch international client/server packages in features.
- Incorporating ISO 9126 Software Quality Modular Aspects: Functionality, Reliability, Usability, Efficiency, Maintainability and Portability
- Data-structure and format based on ISO standards: ISBD, AACR2, Marc21, ISBN, Language 639-1988, Country 3166 & Bibliographic Exchange Format 2709.
- Compatible with ISO Z39:50 client in export/import bibliographic data
- Display catalog in multi-lingual formats through UTF-8.
- Runs on #1 RDBMS Oracle 11g Release 2 / MS SQL Server 2008 / MySQL Community Server. Graphic User Interface with Visual Studio 2013 (.Net). WebPAC using JSP, ASP and PHP.
- Deploys WebPAC on dual platform (Linux and Windows).
- Exports and Imports Bibliographic Records in Marc21 format.
- NICE's Capstone TeamLab has 25 years of expertise in the software design/development field.
- India's premier University / College/ Religious Libraries prefers NirmalSuite 2014.
- More than 350 clients would vouch for the high standard of the package.

## Network Information Resources Manag

### NIRMALSUITE 2014 PREMIUM PACK

It is a superb blend of versatile functionality, incredible capability and operational simplicity, deploying Twelve self-contained modules for perfect library management.

NIRMALA: Acquisition Control System

NIRMALB: Bibliographic Control System

NIRMALC: Circulation Control System

NIRMALS: Serials Control System

OPACPLUS: Online Public Access Catalog

NIRMALU: Nirmals General Utilities

SCS: Self-Charge System

SDS: Self-Discharge System

GEMS: Gate Entry Monitoring System

WebPAC: On Dual Platform (Windows/Linux)

DREAMS: Digital REpository Advanced Management System

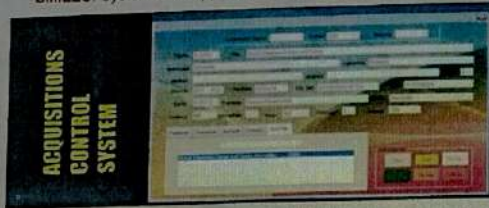

SMILES: Systematic Mapping of Internet Learning E-reSources

Tir

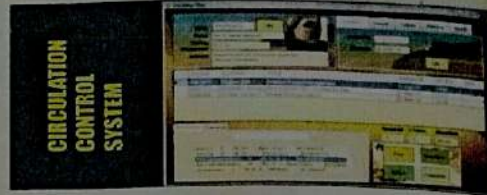

It has considered several factors at the design stage itself and incorporated some of the existing practices and added a new features in line with TQM techniques.

- Builds the database of Titles recommended by the Book Selectin Committee (BSC).
- Does the duplicate checking offline.
- Takes care of the Budger Control.
- Generates customized Reports.

Database creation and building is the first and foremost task that any computer-based library system should address itself. The database has been designed in such a way that is incorporates all essential data elements (fields) described in ISBD (International Standard Bibliographic Description) and transforms/renders them according to the AACR2 format. So, the data elements' and 'bibliographic format' conform to the international standards.

- Maintains bibliographic database for monographs, dissertations and non-book materials.
- Creates the database for journal and book articles.
- Provides for inclusion of Table of Contents (TOC), editorial and Comments.
- Does all validation at the data-entry level itself.
- Automatically transforms the text into the proper case without any need for toggling shift-keys.
- Transfers data from the Acquisition control system.
- Prepares Union Catalogue for resource sharing.
- Creates database of Department library's collection.

Circulation keeps the library collection dynamic and vibrant. It is one of the Modules that comes into direct contact with the users. In an integrated library system, the real-time transactions are reflected in OPAC Library's lending policy has to be spelled out in an unambiguous terms so that the module could incorporate it.

- Maintains the Transaction file
- Identifies the delinquent members and alerts staff to lost or stolen ID cards when presented.
- Checks-Out, Checks-In, Renewals, Reserves and Recalls books and Special Materials categorically.
- Keeps track of and recalls overdue titles.
- Generates barcode for ID's and display photos.
- Displays all items checked out to a patron.
- Automatically prints recall notices/fee statements.
- Calculates fines and fees for overdue items.
- Users and Books usage statistics.
- Registers members and automatically assigns ID's.
- Generates Reports - Daily and Occasional transactions.

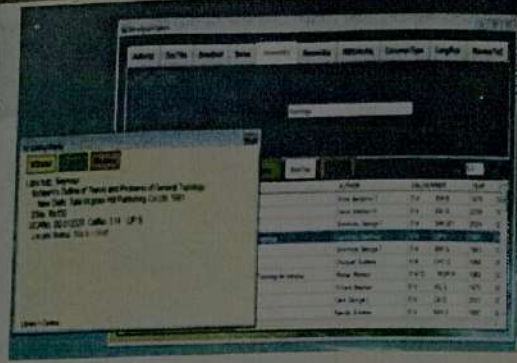

In terms of currency, there is a great divide in library resource periodicals and books. As the library spends nearly one-third of its budget on current literature. Serial Control System cannot be compared with the General Acisition. This takes cares of the Current/retrospective collection of periodical literature. It monitors the incoming issues of the journals and claims pending issues. Creation of Serials Database as per ISDS makes it easy for exchange of data and preparation of union catalogue, provides online access to the retrospective collection. This self-contained module would prove to be a handy tool to control the valuable information resources for the immediate use of the research scholars.

- Maintains Master Serial and Vendor record file.
- Monitors the current issues received.
- Prints out the Periodicals Arrival List (PEARL).
- Keeps track of the issues sent to bindery.
- Attends to Claims and Renewal Requests.
- Controls the budgetary provisions.

# Management of Academic Library System

### OPAC/WebPAC/Z39.50

Client is the touchstone of any library software package. It reveals the real strength and weakness of the package. Does it serve as an effective search tool to map the entire reading materials of the library? It has three display formats: Catalog, Labeled and Marc. The multilingual display format is highly appreciated for regional language collection. You could sort the displayed records and save them too. What is the Multi-Access Points (MAP)? Just a few key-strokes will bring you the amazing results.

- Monograph Author, Title, Browse Subject (Keyword), Browshalf (Class Number), AnyWord, Publisher, Series, Document, Type, Language and Reviews/TOC.
- Articles Author, Title, Keyword, Serials, Any Word and Review/TOC.
- BrowseSerials Current Access through Discipline Country, language and Title. Back-Volumes Access through Title for the entire holdings including Gaps in Volumes and Issues.
- Course Reserve Books reserved for on-going courses

### NIRMALS GENERAL UTILITES

NIRMALS<sup>®</sup> provides general utilities mainly meant for the Database Administrator. It considers the database as an invaluable bibliographic asset of a library. A Software does not have a simple mechanism for Securing, exporting database in an international format, installing. In the, what's the EXIT COST of the NIRMALS<sup>®</sup> guarantees your database with reliability and portability.

- exports and Imports data from other sources through ISO 2709 format using Marc21 tags.
- Backs up your database and restores it in an easy and economic way.
- Prepares Accession Register.
- Generates lists of books added to the library in Excel-compatible format.

- Provides an easy way of Stock Verification through barcode/RFID.
- It has built-in facility for generating barcodes for books, journals and patron IDs.
- You can print catalogue cards and spine labels if needed.

### GATE ENTRY MONITORING SYSTEM (GEMS)

The customer movement surveillance is a significant aspect of library management. The user's movements in and out of library denotes the dynamics of the library. GEMS keeps track of the Check-In and Check-Out of patrons and it's guest. This module is specially useful for academic libraries to register the attendance of students in the library and to identify the genuine users.

### HARDWARE REQUIREMENTS:

#### Server System

Intel® Xeon® Processor Based Server / Intel® Core™ i3/i5 Processor 2x4GB Memory, 1x500GB SATA

#### Client Systems

Intel® Core™ i3/i5 Processor, with 2/4GB RAM, HDD 500 GB

#### Operating System

Windows Server 2008 (32-bit) for Database Server; Windows 7 (32-bit) for Client Systems

#### Application Software

Oracle 11g R2 / MS SQL Server 2008 Visual Studio 2010
